

Strimech Pro-AG High Capacity Grass Fork

Strimech's high capacity grass fork is designed and manufactured to the very highest standard, making it both powerful and durable, which offers a longer working life thus making it the perfect choice for any contracting work. Strimech's grass fork is designed for maximum productivity when handling large volumes of grass into the silage clamp. It also comes with 2 side tines on either side as standard, ensuring the capacity of the fork is fully utilised. The re-designed back is now filled in to prevent materials falling onto the headstock but still provides adequate visibility.

Features:

- 20mm Thick Full Length Wear Edge.
- Heavy Duty Channel Tine Housing.
- 1400mm Long Hardox or Spring Steel Tine Option.
- Straight Back For Maximum Capacity.
- 4 Side Tines (2 each side).
- Integral Spill Guard.
- Bolt On Side Extensions Available.
- 6 Different Width's Available.

Model	Width	Height	Depth	Tines
GFS7	2.11m (7' 0")	1.35m (4' 5")	1.45m (4' 9")	KV
