

Strimech Pro-AG ShearMASTER

Our Shearmaster is designed to cut grass and maize silage from a silage clamp efficiently and leave behind a smooth clamp face. The heavy duty design guarantees that Strimech shearmasters are both powerful and durable, which offers a longer working life. If kept sharp the serated blades are designed to leave a sealed pit face which eliminates secondary fermentation. The new design comes complete with 2 robust stops fitted, preventing the cutting blade from coming into contact with the ground.

FEATURES:

- 10mm Thick Box Section.
- 12mm Thick Side Plates.
- Serated Blades.
- Heavy Duty 4" Bore Rams.
- Heavy Duty Pivot Pins.
- Heavy Duty End Tines.
- Weld On Or Bolt On Brackets (optional extra).
- Straight or Cranked Tines available.
- 4 Different Options to Suit Loaders or Telehandlers.
