

Strimech Shear Bucket range based around 4 models and the design inline with our Shear Grab range giving high strength and longevity. Essential components within the design being Hardox material providing maximum durability while hydraulic rams are also perfectly matched for the grab size giving unrivalled performance. Excellent cutting capability with an all-round Hardox blade design allowing efficient use at the grass clamp as well and the bucket concept gives ease of use with as loose feeds saving time and fuel without feed waste. Bolt on bracket design for the machine pick up giving quick & simple change swapping over from machine to machine between current fleet or if the handler is changed.

- All cutting blades are Hardox.
- Boron 500 bucket toe plate.
- Heavy duty 10mm box section.
- All pivot points are fully bushed.
- Suitable for all types of feeds whole to precision crop including Maze and grains.
- Bolt on bracket system allowing a wide range of machine compatibility.
- Full spare parts back up.

Model	Capacity (m ³)	Weight (kg)	Overall Width (mm)	Cutting Width (mm)	Knife Blade Qty	Hyd Rams
