

Strimech is the market leader for folding forks with excellent build quality, strength and durability. The updated design gives enhanced protection against daily wear. It safeguards against material build up and minimises wing damage from vehicle movement. These features extend the life of the product and offer greater value for money. The heavy-duty attachment is powerful and hard wearing with protective features that reduce the impact of day to day operation on the working life of the fork. This makes the Pro Ag Folding Fork the perfect choice for contracting work. It compliments a vast range of loading shovels from leading machinery manufacturers. We offer a number of different sizes to cover customer requirements.

- The Pivot design guards against impact of material build up
- Hydraulic rams minimise degradation of wings from vehicle vibration
- Hydraulic hoses enclosed via protective steel guard
- Angled plates on wings and body protect against material build up
- Hardox tines and heat-treated Boron wear plates on contact surfaces for durability
- Custom branding options available
- 3 width size options – 12 ft, 14 ft & 16 ft

Model	Open width (mm/ft)	Closed width (mm)	Height (mm)	Weight (kg)
PAFF1201	3736/12ft	3036	1535	1555
PAFF1401	4336/14ft	3036	1535	1697
PAFF1601	4936/16ft	3036	1535	1835
