

The Potato Scoop is available in a variety of widths and sizes and comes without any sharp edges in order to protect the crops whilst being handled. The bucket has a boron 500 leading edge as standard to offer a greater working life.

- Designed for handling potatoes.
- Rounded edges for crop protection.
- Boron 500 weld-in edge as standard.
- Suitable for machines with up to 3 tonnes lift capacity.
- Spill guard as an optional extra.

Model	Capacity (m ³)	Depth (mm)	Height (mm)	Width (mm)	Weight (kg)
PSC15-70	1.6	1200	1000	2130	530
PSC15-76	1.7	1200	1000	2290	550
PSC20-76	2	1650	1030	2290	590
PSC20-80	2.1	1650	1030	2440	600
