

The double hydraulic fork positioner offers greater control and safety to the operator who can safely move the pallet forks in and out from inside the cab.

- Change pallet fork position from cab
- Both forks operate hydraulically
- Increased operator safety
- Reduces cycle times
- Can use existing round bar type forks
- Supplied with Round bar as standard to suit machine size
- Load maintained central to boom
- Helps reduce damage to materials & pallets
- Pallet forks at extra cost
- Wider 1.5m carriage available
- Option of dual ZM2/ZM3 available for Merlo machines

Model	Capacity
DFP35	3500kg/7700lb
